Privacy risks associated with SRTS PII collection include unauthorized access to PII, inaccurate information in the system, and unauthorized disclosure of PII. These risks are addressed by the following.:
1. The system will have role-based access.
2. There are procedures in place to reduce the amount of inaccurate information presented to SRTS.
3. Appropriate safeguards are in place to minimize the possibility of disclosure. The database is physically housed in an access-controlled server room and appropriate application level security is in effect.
