c. Does this DoD information system have an IT investment Unique Project Identifier (UPI), required by section 53 of Office of Management and Budget (OMB) Circular A-11?

- Yes
- No

If "Yes," enter UPI

If unsure, consult the Component IT Budget Point of Contact to obtain the UPI.

d. Does this DoD information system or electronic collection require a Privacy Act System of Records Notice (SORN)?

A Privacy Act SORN is required if the information system or electronic collection contains information about U.S. citizens or lawful permanent U.S. residents that is retrieved by name or other unique identifier. PIA and Privacy Act SORN information should be consistent.

f. Authority to collect information. A Federal law, Executive Order of the President (EO), or DoD requirement must authorize the collection and maintenance of a system of records.

(1) If this system has a Privacy Act SORN, the authorities in this PIA and the existing Privacy Act SORN should be the same.

(2) Cite the authority for this DoD information system or electronic collection to collect, use, maintain and/or disseminate PII. (If multiple authorities are cited, provide all that apply.)

(a) Whenever possible, cite the specific provisions of the statute and/or EO that authorizes the operation of the system and the collection of PII.

(b) If a specific statute or EO does not exist, determine if an indirect statutory authority can be cited. An indirect authority may be cited if the authority requires the operation or administration of a program, the execution of which will require the collection and maintenance of a system of records.

g. Summary of DoD information system or electronic collection. Answers to these questions should be consistent with security guidelines for release of information to the public.

(1) Describe the purpose of this DoD information system or electronic collection and briefly describe the types of personal information about individuals collected in the system.

The AGFA HealthCare DX-D 100 is a mobile X-Ray system that brings the key capabilities of a radiology capabilities of a radiology room right to the patient - at the bedside, in the operating room, or emergency department. This system is used on patients who lack the ability to move to an X-ray room or to position themselves properly for imaging. It uses Modality Work list software to facilitate automatic transfer of patient and procedure data from Composite Health Care System (CHCS) and Picture Archival and Communication System (PACS) eliminating manual data entry. The information from the Modality Work list is associated to the x- ray images obtained by the system. Images are then sent to PACS for permanent storage.

The types of PII collected include Name, Social Security Number, Patient Accession Number, Date of Birth, and Medical information.

(2) Briefly describe the privacy risks associated with the PII collected and how these risks are addressed to safeguard privacy.

The privacy risks associated with the PII collection are unauthorized access, inaccurate information in the system/electronic collection and unauthorized disclosure of PII. There are administrative, physical, and technical security measures in place to mitigate these risks. The security measures are addressed in Section 3d and 3f below.
